Education

Mashreq University, BS in Software Engineering – Khartoum North, Sudan Oct 2019 – Feb 2023

- Graduated with Honors
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Web Development, Mobile Application Development, Operating Systems, Computer Networks

Experience

Freelance Web Developer (Remote), Startup Client (E-commerce) – Medina, Saudi Arabia May 2023 – Sept 2023

- Built and deployed a Laravel-based admin dashboard for managing products, orders, and users
- Integrated invoice and payment APIs; connected to MySQL using stored procedures
- Created responsive UI with HTML, CSS, and JavaScript

Projects

To-Do App | React, Spring, Supabase, Redux, Docker, Vite Aug 2025 – Dec 2025

Full-stack to-do application with state management and containerized deployment

- Built a full-stack task management app using React and Redux for state management, Spring Boot backend, and Supabase for data persistence
- Containerized the application with Docker and bootstrapped the frontend with Vite for fast development builds

Expense Tracker | React, TypeScript, Node.js, Express Apr 2026

Full-stack expense tracker with categorized transactions and real-time budgeting dashboard

- Implemented categorized transactions with real-time dashboard for tracking income and expenses

Realtime Chat App | Next.js, Node.js, Express, Socket.io Feb 2026 – Mar 2026

Full-stack real-time chat application with instant messaging and live updates

- Implemented real-time messaging using WebSockets with live updates and user interaction

Skills

Languages: JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Laravel, Spring Boot, Tailwind CSS, REST APIs, openAPI, JWT

Tools: Git, Vite, MongoDB, MySQL, Supabase, Docker, Postman,
